

Student Wellbeing

Wellbeing throughout the School Day

The wellbeing of our students runs across the whole school day and it is the responsibility of every member of staff to make this happen. It can be broken down into 4 areas displayed in the diagram below which are encased in a supportive, safe, accessible and engaging environment.

Cognitive: We aim to deliver an ambitious student-centred curriculum which challenges students to learn new things and problem solve.

Physical: We aim to deliver a daily supportive programme to encourage students to be as physical, independent and active as possible. Thus improving their ability to learn and do things for themselves.

Social and Emotional: We recognise, celebrate and reinforce personal abilities and development through CIRCLE. We have a range of staff to support all individual needs of the students and their families.

Psychological: We encourage personal growth and a sense of purpose through ambitious expectations for all students, supported by our curriculum, staff, targeted interventions, realistic Personal Learning Goals and Next Step processes.
